

FactoryLogix MES Business Value Reports

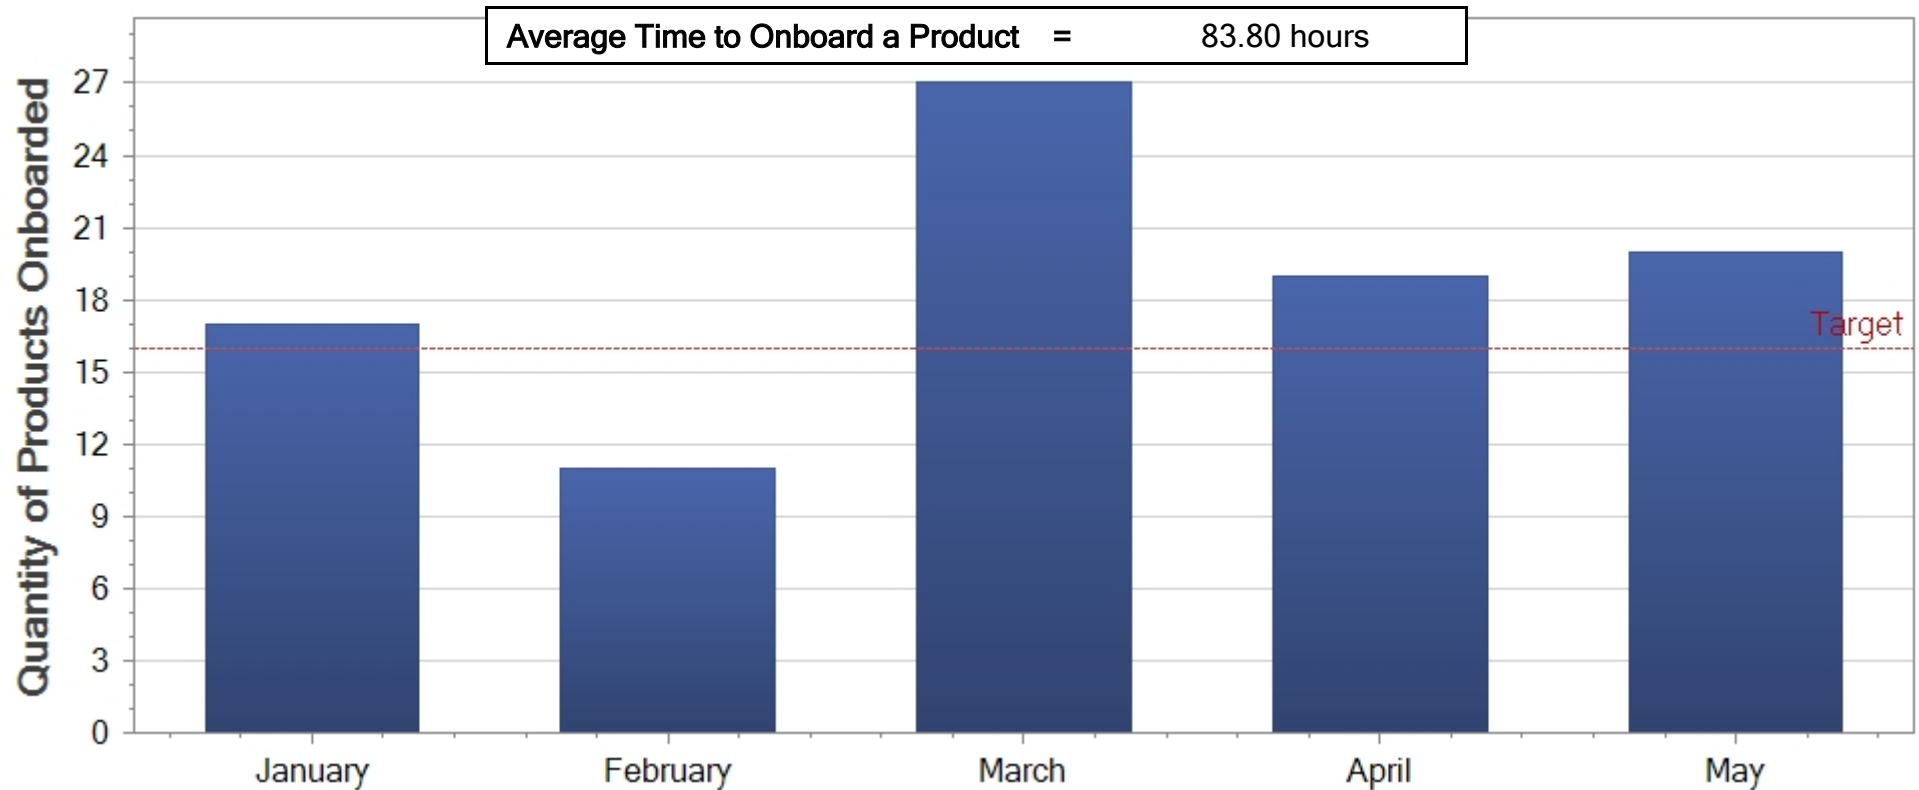

MES Onboarding Progress Report

This report shows the actual onboarding rate of products, to FactoryLogix vs the set target in order to track progress and maintain alignment with the project delivery plan.

The chart below shows how many products have been onboarded, grouped by month, vs target. Average time to onboard and release a product is also displayed:

Products Released to Production by Month Vs Target

The chart below shows the distribution of load across the engineering team identifying the number of products onboarded by each engineer:

Difference in the qty of products onboarded by each engineer may be indicative of either unbalanced workload allocation or capability issues

Onboarding Load Distribution by Engineer
