

FactoryLogix MES Business Value Reports

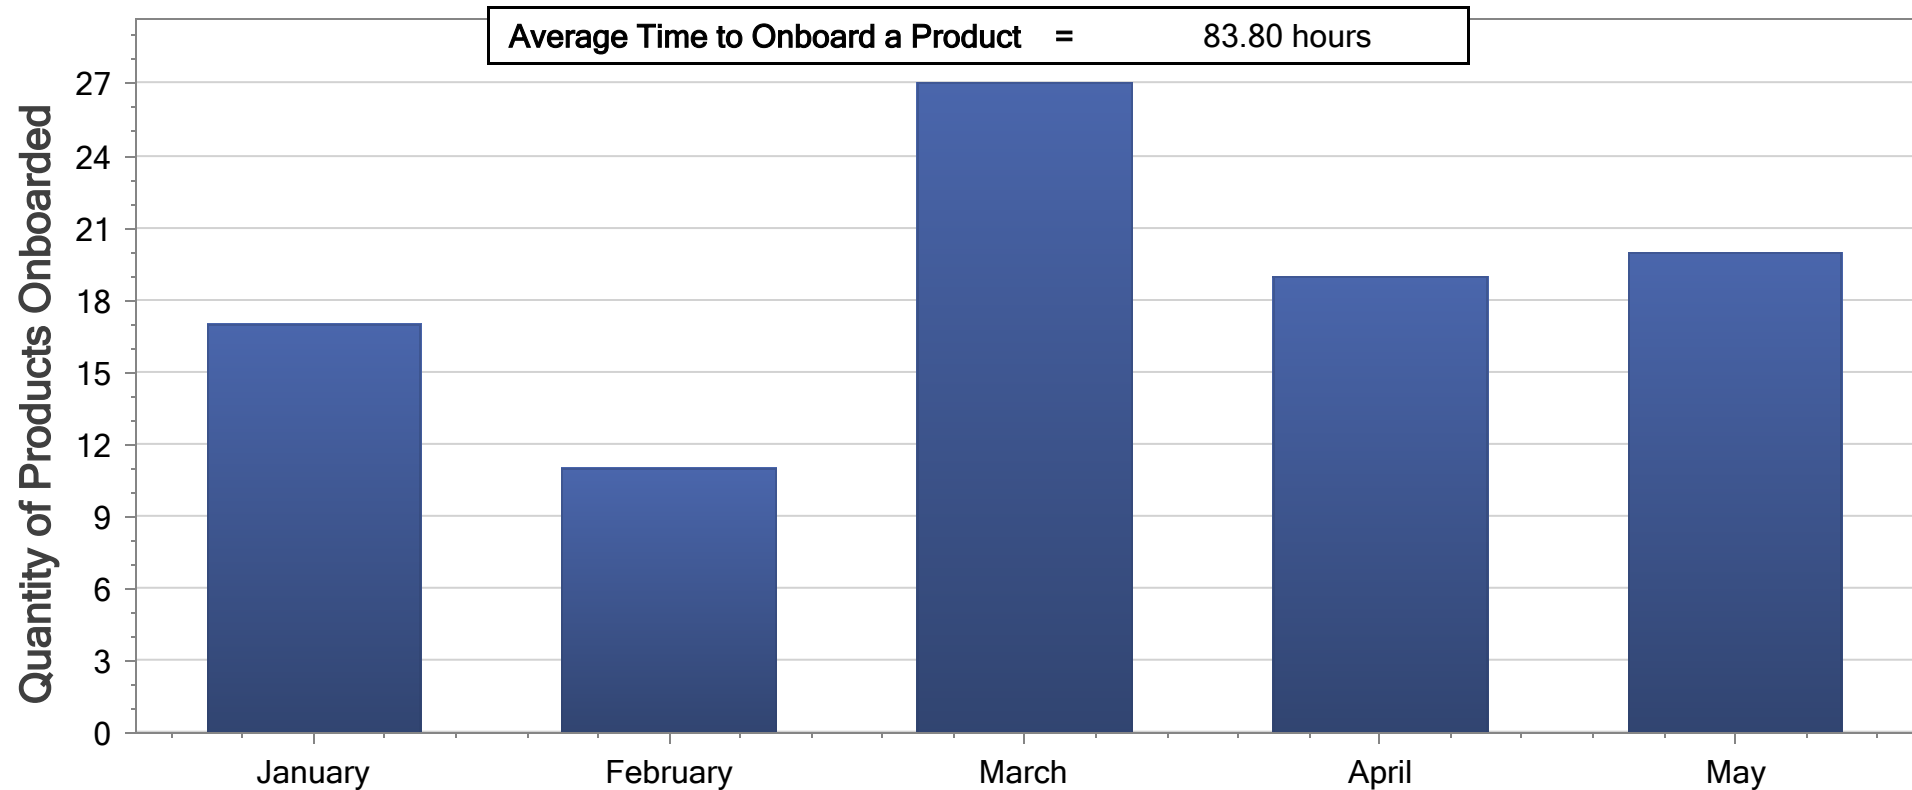

Rate of Product Releases to Production

This report shows the actual onboarding rate of products, to FactoryLogix, in order to track engineering effort preparing products and processes for operational use.

The chart below shows how many products have been onboarded grouped by month. Average time to onboard and release a product is also displayed:

Products Released to Production by Month

The chart below shows the distribution of load across the engineering team identifying the number of products onboarded by each engineer:

Difference in the qty of products onboarded by each engineer may be indicative of either unbalanced workload allocation or capability issues

Onboarding Load Distribution by Engineer
